

## Teat Belt Features

- Elastomer Teat Belts for long life, even when using sand bedding.
- Ribs on flaps provide fast cleaning and greater stimulation.
- Segmented, overlapping flaps that gently conform around the teat.
- Double ribbed flaps can be flipped for more life.

## UDDER GUN™

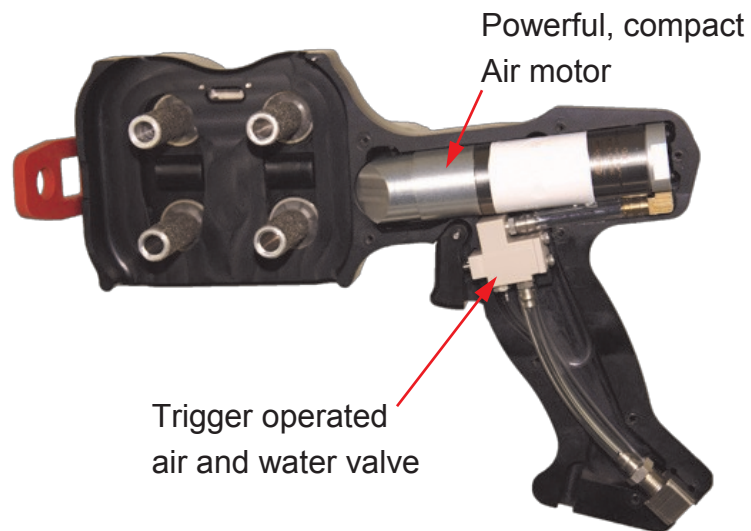

- Exclusive teat belt design
- More complete teat coverage
- Auto adjusts to teat size
- Excellent stimulation
- Quick and thorough cleaning
- Air driven

## Drive System

- Dual belts power all four spindles
- Drive belts also tension teat belts together adjusting for teat size and shape

## Inside The Gun

Powerful, compact  
Air motor

Trigger operated  
air and water valve

# UDDER GUN™

## Teat Scrubber

If you have a parlor,  
you should try the Udder gun

### Save Money

- Lower chemical usage
- Choose your own, compatible pre-dip chemical
- Reduced towel and laundry cost

### Increase Profit

- Faster, consistent prep.
- Better stimulation for let down

### Low Running Cost

- Wear parts cost \$0.46/cow/month
- Less than 1 oz. of mixed chemical per cow

## Features

- Exclusive elastomer teat belts use flaps to contact and conform to each teat.
- The belts auto adjust to size and shape of teat.
- Teat end is cleaned when entering and exiting teat belts.
- As the teat belt flaps rotate around the lower shaft, they accelerate to flick off water and debris.
- Water/chemical mixture sprayed onto belts and teat at 6 oz./min.
- 2 stage trigger allows the operator to easily shut off water/sanitizer to go back around teats to partially dry off if desired.

# UDDER GUN™

US Patent No. 9,072,274

# The **UDDER GUN**™ System

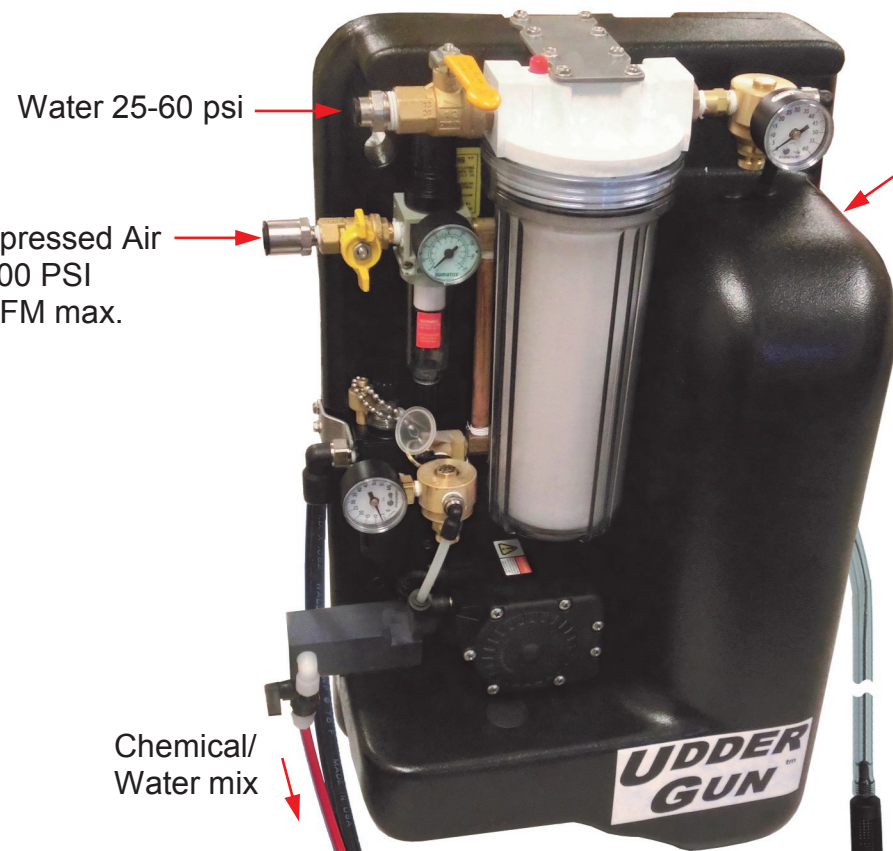

## UDDER GUNS

- Two handheld guns in system
- Compact and lightweight, 2.5 lbs.
- Ergonomic, balanced pistol grip design
- Powerful air motor driven
- Trigger operated
- Durable, impact resistant ABS material
- Narrow design for better udder access
- Gun head clearance to other teats
- Quick change, modular design
- Easy open covers

## Gun Hoses 33'

- Durable rubber
- Abrasion resistant sheath
- Flexible and lightweight
- Supplies air and fluid
- Quick couplers on inlet

Water 25-60 psi

Compressed Air  
90-100 PSI  
16 CFM max.

Chemical/  
Water mix

Primary Hoses  
• One 50', Two 25'

Chemical suction hose 8'

## PREP STATION UNIT

- Mixes water and chemical to desired proportion
- Adjustable mix ratio
- Can also run RTU product
- All mechanical operation, no electricity
- Powered by air and water pressure
- Sends water/chem mix to guns
- Durable wall mounted unit
- Height-24" Width-14" Depth-8"

## Compatible Pre-Dip Chemicals

- Pre-dip should include emollients
- Iodine
- Lactic Acid
- Hexidine
- Peroxide

**CAUTION** Do NOT use with strong oxidizing chemicals such as:

- Hypochlorous Acid
- Sodium Hypochlorite
- Any other chemical that damages stainless steel

## FLUSH STATIONS

- Gun holster with water spray flush
- Inserting gun starts water flow
- Automatic timed valve shuts off
- Stainless steel construction
- Versatile mounting system

## No Tool Disassembly
